

TVM

TVM

INTRODUCTION

The TVM instruments are perfect for height measurements and scribing work and reliable in all kinds of workshop conditions. The result of an unique, compact design of the instrument is great mobility and extreme stability.

Because of its advanced measuring system, the self-contained working time of the TVM is one year. Therefore it can be used for multiple applications in the workshop area. The simplicity of manipulation allows constant change of the user without any time-consuming training.

The success of the TVM among competitive gauges is outstanding. More than 14'000 instruments are in use worldwide.

Three models are available: with application range from 300 to 1000 mm. A large range of accessories for all kinds of measuring applications is available.

V/V Plus

V/V Plus

INTRODUCTION

Talking about the V and V Plus series means looking at a height measuring instrument of universal use.

The new ergonomic and compact design has been well accepted from the industry worldwide. Ease of use and quick performance of all measuring tasks are given by the clearly defined function keys.

The updated measuring system combined with a powerful display unit guarantees high precision and maintains an incomparable self-containment of use in any manufacturing conditions.

The adjustable measuring force of V Plus models between 0.7 N and 1.6 N (0.3 N on request) allows the performance of measurements on components of delicate material.

The result of a modular instrument concept is a complete series with application ranges from 300 mm to 1235 mm at very competitive prices.

A wide range of accessories makes it possible to solve all required measuring tasks.

PERFECT FOR USE IN THE WORKSHOP AREA

EXTREMELY EASY TO OPERATE

AUTONOMOUS USE WITH RECHARGEABLE BATTERY PACK

AIR CUSHION STANDARD ON C VERSION (V PLUS)

CLEAR DEFINITION OF ALL MEASURING FUNCTIONS

EXTREMELY LARGE DISPLAY OF VALUES

ACCEPTANCE OF A MEASURED VALUE BY ACOUSTIC SIGNAL

DIRECT RS232C DATA OUTPUT (BI-DIRECTIONAL)

ADJUSTABLE MEASURING FORCE

DESCRIPTION

-  Surfaces
-  Internal/external diameters
-  Centerline distances
-  Min/Max/Delta
-  2 references
-  Squareness measurements
-  Calculation mode

¹⁾ The instruments V305 and V305C are with low measuring force (0.3-1.2 N)

V/V Plus

APPLICATIONS

Checking of squareness deviation

Tiny Surface, diameter and centerline distance measurements (V-5/V50.9)

Depth measurement (TA-IH-109/V-50.5/V-50.4)

Checking of surface distances (TA-MI-101)

Thickness measurements (TA-MI-101)

Min/max measurements (TA-MI-101)

VECTRA-TOUCH

VECTRA-TOUCH

INTRODUCTION

The "Vectra-Touch" height measuring instruments are of universal use in any production field. They are the result of 40 years of experience in development and manufacturing. This experience makes it possible to introduce a product that combines ergonomic design with new technology. Its reliable concept is a reference for durability. Ease of use and quick performance of all required measuring tasks allow unlimited applications in any manufacturing area.

The distinctive design of the Vectra-Touch, as well as its exceptional functionalities, offer the user an ease of use unequalled on the market. The display unit is identical for all models and gathers all assets for a rational use in the workshop. A limited number of keys (19) makes the instrument accessible to any user, whatever his level of training. The robust colour touch screen offers great ease of use. Only essential information will be provided to the user. A graphic assistance guides the execution of all measurements.

Ease of use has been an absolute priority in the requirements, thus resulting in functions, usually considered as complex, such as 2D, programming, statistics, becoming child's play.

VECTRA-TOUCH

APPLICATIONS

Diameter measurement with graphic help "EasyScan" (TA-MI-101/TA-AD-101)

Squariness mechanically adjusted on all instruments

Measurement of angles and cones with graphic help display (TA-MI-101/TA-AD-101)

Measurement with automatic displacement in programming mode

Checking of squariness using an additional electronic probe and colour print-out of the curve (TA-MS-101)

Measurement using temperature compensation system with optional external sensor (TA-EL-120)

Storage of all data to an external memory, e.g. USB Memory Stick (TA-EL-140)

Wireless communication by Bluetooth or Wi-Fi (optional) (TA-EL-123/4)

Standard probes up to 320 mm. (here optional 550 mm)

MESTRA + TOUCH

MESTRA+TOUCH

INTRODUCTION

The "Mestra" height measuring instruments are classified among the most accurate ones worldwide. This new instrument line is the result of 40 years of experience, which makes it possible to offer a product having advanced technologies combined with ergonomic design.

The result of the well designed instrument concept incorporating an entire new measuring system is an optimum accuracy level. The extreme ease of use allows unrestricted application in production areas as well as in measuring laboratory environment.

Two specific models are available, "Mestra" and "Mestra-Touch". The difference between these two models is the layout of the display unit as well as the available measuring functions. The "Mestra" has a display unit incorporating all basic functions such as checking of heights, depths, diameters and centerline distances, squareness deviation, angles and tolerance limits indication. In addition the "Mestra-Touch" offers a colour touch screen and functions such as the 2-coordinate system, programming of measuring sequences, statistical analysis of memorized values and display of environmental temperature.

MESTRA + TOUCH

APPLICATIONS

Height measurement of a small board (TA-IH-109/V-50.5/TA-MI-118)

Checking of a small diameter using the adequate measuring insert (V-5/V-50.9)

2-coordinate measurement with standard graphic help (TA-MI-101/TA-AD-101)

Checking of squareness deviation using an additional electronic probe and colour print-out of the curve (TA-MS-101)

Measurement of a groove using a 90° angled measuring insert holder and an L-shaped insert (TA-IH-105/V.50.5/V-50.3)

Automatic measurement of an external diameter performed with "TRIMOS® NC movement" (TA-MI-101/TA-AD-101)

The complete digital measuring system offers an extremely high accuracy (TA-MI-101/TA-AD-101)

An USB data output allows the storage of all data on an USB Memory Stick as well as the printing of protocols (TA-EL-140)

Wireless communication by Bluetooth or Wi-Fi (optional) (TA-EL-123/4)
